

LED Specification and Cross-Reference Guide

REVOLUTION 194-70™ BULB

2 Per Pack

W2.1 x 9.5d

Wedge Base

PRODUCT NAME	Revolution 194-70™
SKU Number	834760002215
Color temperature	6500K
Lumen output	70 Lumens
Voltage / Regulated Range	12 Volts DC / 9-15 Volts
Total Watts / Total Amps	1.3 / .096
Comparable to bulb/s	194, 516, 579, 901, 904, 906, 912, 915, 916, 917, 918, 920, 921, 922, 923
Bulb Base	W2.1 x 9.5d Wedge Base
Life Span	60,000 Hour Life Expectancy

Important
 Not all vehicles require a load resistor for the "Turn Signal Circuit". Please test your vehicle prior to purchasing these resistors. To perform a self test, simply install your new LED bulb into your socket. Next activate your signal. If your LED bulb does not blink, or if it blinks rapidly, then you must install a load resistor. If your indicator light blinks as normal, then no load resistor is needed. Also, you may need to install more than one load resistor per circuit, depending on how many lights are wired to that circuit. To determine if you need more than one load resistor, please initiate self-test above after installing the LED bulb and load resistor.
